

ARNAV RINAWA

+91 9166270181 | Jaipur, India | rinawarnav@gmail.com | linkedin | github | leetcode

OBJECTIVE

Aspiring Software Engineer with experience in full-stack development, REST APIs, and AI-powered applications using React, Node.js, and Python. Passionate in software engineering and intelligent systems development.

EDUCATION

The LNM Institute of Information Technology, Jaipur <i>B.Tech-M.Tech (3rd Year), Electronics and Communication Engineering</i>	2023 – Present CGPA: 7.15
MPS International School, Jaipur <i>Class XII (CBSE)</i>	2023 87.8%
MPS International School, Jaipur <i>Class X (CBSE)</i>	2021 94%

SKILLS

Languages: C/C++, Python, Java, JavaScript, SQL
Web Development: React, Node.js, HTML, CSS, REST APIs
AI/ML: Machine Learning, NLP, Time-Series Forecasting, Scikit-learn, XGBoost
Data & Tools: NumPy, Pandas, Data Visualization, Statistical Analysis
Developer Tools: Git, GitHub, VS Code

EXPERIENCE

Teaching Assistant, Basic Electronics Lab, LNMIIT <i>Jaipur, India</i>	Aug. 2024 – Dec. 2024 <u>Certificate</u>
– Guided 50+ students through hands-on experiments in analog and digital circuits, semiconductor devices, and measurement techniques; awarded <i>Certificate of Appreciation</i> by the Dean of Academics, LNMIIT for punctuality and efficient student query resolution.	

PROJECTS

- AI-Powered Jira Agent** | *React, Node.js, Express, Groq LLM, REST APIs, PDFKit* [GitHub](#)
- * Engineered production-grade AI agent that converts plain English commands into Jira actions ("assign the bug to Sarah") using Groq's Llama-3.3-70b with zero-shot JSON parsing—eliminating manual ticket management for project teams.
 - * Architected full-stack system: React command center frontend + Node.js/Express backend orchestrating real-time Jira REST API calls with intelligent error handling and conversational context retention across multi-turn interactions.
 - * Shipped automated sprint reporting feature generating PDF analytics from raw Jira data, deployed on Vercel + Render with 100% uptime during beta testing with 15+ active users.
- EEG Motor Imagery Classifier for Brain-Computer Interfaces** | *Python, PyTorch, MNE, scikit-learn* [GitHub](#)
- * Built BCI system classifying left/right hand movements from EEG signals across 109 subjects with 92%+ accuracy using CSP spatial filtering, ICA artifact removal, and SVM with optimized RBF kernel on PhysioNet dataset.
 - * Implemented EEGNet CNN and classical ML models (CSP+LDA) with subject-independent validation; engineered signal processing pipeline extracting 15+ time-frequency features (ERD/ERS, spectral entropy, band powers) from motor cortex channels.

EXTRA-CURRICULAR ACTIVITIES

- **Fest Head, Desportivos (Annual Festival), LNMIIT (2024-26)** – Led 100+ member organizing committee managing 50L+ budget and 15+ sporting/cultural events with 1,500+ participants from 75+ colleges nationwide; secured headline artist Sachin-Jigar following successful coordination of previous editions featuring Darshan Raval and Seedhe Maut.
- **Active Performer, Drama Club, LNMIIT** – Represented the institute in regional cultural competitions and collaborated on theatrical productions showcased at inter-college festivals.
